

Levenshulme High School – Curriculum Map – Maths Year 9 Core

|                         |                              | Term 1  |   | Term 2   |  | Term 3  |  |
|-------------------------|------------------------------|---|---|--|--|---|--|
| Topic Title and NC link |                              | A8, A4, A11, A1, G8, R9   | G5, G10, G11, A15, A16  | G1, G2, G4, G9   | G1, G14, A5, A7  | N3, S3, G8, G14   | S1, S2, P1, P2, P3   |
| Year 9 Core             | <i>Pupils should know...</i> | <ul style="list-style-type: none"> <li>How to find missing points in shapes</li> <li>How to find midpoints of lines</li> <li>How to plot linear graphs including horizontal and vertical</li> <li>How to identify gradient and intercept</li> <li>How to give the equation of a line.</li> <li>How to reflect in horizontal, vertical and diagonal mirror lines</li> <li>Identify mirror lines and equations</li> <li>What invariant means</li> </ul> | <ul style="list-style-type: none"> <li>How to find the term to term rule of a sequence and use it to generate terms of an arithmetic sequence</li> <li>How to find the position to term rule and use it to generate terms of an arithmetic sequence</li> <li>How to calculate the nth term of an arithmetic sequence and use it to generate terms of a sequence</li> <li>How to recognise special sequences, such as, square and triangle numbers</li> <li><b>What is a quadratic expression</b></li> <li><b>Expand two brackets</b></li> <li><b>Expand more than two brackets</b></li> </ul> | <ul style="list-style-type: none"> <li>Find area of 2D shapes</li> <li>What surface area means</li> <li>How to find the surface area of basic 3D shapes</li> <li>What does enlargement mean</li> <li>How to identify if a shape has been enlarged</li> <li>How to enlarge a shape with whole number and fractional scale factors</li> <li>How to enlarge from a centre</li> <li>How to find the centre of enlargement</li> <li>The meaning of similarity and congruence</li> <li>How to prove shapes are similar or congruent</li> <li>Difference between proof</li> </ul> | <ul style="list-style-type: none"> <li>How to draw a bar model to represent an equation</li> <li>How to solve equations with variables on one and both sides</li> <li>How to solve equations with fractions</li> <li>Rearranging simple equations</li> <li>Label sides of a right-angled triangle</li> <li>Know Pythagoras' theorem and be able to apply it to a question</li> <li>How to calculate the volume of a cuboid</li> <li>What is cross</li> </ul> | <ul style="list-style-type: none"> <li>What translation means</li> <li>What a vector is and how it is written</li> <li>What a translation looks like</li> <li>What rotation is</li> <li>What rotation looks like</li> <li>How to describe a transformation</li> <li>Find HCF, LCM and unique factorisation theorem</li> <li><b>How to calculate the equation of parallel and perpendicular lines</b></li> <li>What is a scatter graph and what is it used for</li> <li>What is a line of best fit</li> <li>How to read information</li> </ul> | <ul style="list-style-type: none"> <li>How to find averages from lists</li> <li>Understand what range measures</li> <li>Know why you can only estimate the mean from grouped data</li> <li>What are quartiles</li> <li>What is the interquartile range and what does it tell us</li> <li>Understand what sampling is and what types of sampling can be used</li> <li>What is probability</li> <li>What is the probability scale</li> <li>How to calculate a probability</li> </ul> |

|                                       |  |   |  |  |  |   |
|---------------------------------------|--|---|--|--|--|---|
|                                       | <ul style="list-style-type: none"> <li>How to recognise if amounts are in proportion</li> <li>Use multipliers for a variety of problems in different contexts</li> </ul>   | <ul style="list-style-type: none"> <li><b>Factorise a quadratic expression in different forms</b></li> <li>The conventions for labelling angles, sides and lines</li> <li>How to identify alternate, co-interior and corresponding angles</li> <li>How to use our known angle facts to calculate missing angles on a straight line, at a point, in triangles and quadrilaterals</li> <li>What plan and elevation means</li> </ul> | <p>and demonstration</p> <ul style="list-style-type: none"> <li>How to find the area of a sector</li> <li>How to solve problems to find what fraction of a circle you have</li> <li>How to construct triangles using a protractor and a compass</li> <li>How to construct line and angle bisectors using a compass</li> <li>How to construct loci</li> </ul> | <p>sectional area</p> <ul style="list-style-type: none"> <li>What is the formula for volume of a 3D shapes</li> <li>How to find the volume of cubes, cuboids and triangular prisms</li> </ul>  | <p>from a scatter graph</p> <ul style="list-style-type: none"> <li>Know and use the terms positive and negative correlation</li> <li>Understand what is meant by relationship</li> <li>Understand the terms interpolation and extrapolation</li> <li>In trigonometry corresponding sides are proportional</li> </ul> |   |
| <i>Pupils should be able to do...</i> | <ul style="list-style-type: none"> <li>Plot linear graphs</li> <li>Interpret linear graphs</li> <li>Fill in missing co-ordinates on a table.</li> <li>Identify whether a co-ordinate is on a given line from the equation</li> <li>reflect in horizontal,</li> </ul> | <ul style="list-style-type: none"> <li><b>Expand and factorise quadratic expressions</b></li> <li><b>Identify subtracting the squares</b></li> <li><b>Use Wendy's way to factorise harder quadratic expressions</b></li> <li>Find missing angles in parallel lines</li> <li>Solve more complex angle problems</li> </ul>  | <ul style="list-style-type: none"> <li>Enlarge a shape with and without a centre</li> <li>Describe an enlargement</li> <li>To find the surface area of basic 3D shapes</li> <li>Calculate the areas of a sector</li> <li>Find missing information from similar shapes</li> <li>Prove that shapes are congruent</li> </ul>                                    | <ul style="list-style-type: none"> <li>Able to solve equations where the coefficient of x is a fraction</li> <li>Able to rearrange equations including formulas</li> <li>Find the missing hypotenuse of a right-angled triangle</li> </ul> | <ul style="list-style-type: none"> <li>To be able to translate a shape with worded instructions</li> <li>To translate a shape using a given vector</li> <li>To describe fully a translation</li> <li>To be able to rotate a shape, including with a given number of degrees, direction and</li> </ul>                | <ul style="list-style-type: none"> <li>Calculate estimated mean from grouped data</li> <li>Calculate the quartiles from data and find the interquartile range</li> <li>Compare data</li> <li>Comment on sampling</li> <li>State the chance of an event happening</li> </ul> |

|  |  |  |  |   |   |  |   |
|--|--|--|--|---|---|--|---|
|  |  | <p>vertical and diagonal mirror lines</p> <ul style="list-style-type: none"> <li>• Identify mirror lines and equations</li> <li>• Identify invariant points</li> <li>• Problem solve with multipliers</li> </ul> | <ul style="list-style-type: none"> <li>• Draw the plan and elevations of a 3D shape</li> <li>• Interpret plans and elevations</li> <li>• What the nth term is</li> <li>• How to recognise special sequences</li> </ul> | <ul style="list-style-type: none"> <li>• Calculate the areas of sectors and composite shapes</li> <li>• Problem solve with sectors</li> </ul> | <ul style="list-style-type: none"> <li>• Find one of the other missing sides of a right-angled triangle</li> <li>• Solve problems using Pythagoras' theorem</li> <li>• <b>Apply Pythagoras' theorem to 3D problems</b></li> <li>• How to apply knowledge of area of circles to finding volume</li> <li>• How to apply the knowledge of volume to problem solving questions</li> </ul> | <p>centre of rotation</p> <ul style="list-style-type: none"> <li>• To describe fully a rotation</li> <li>• Answer problems using prime factor lists</li> <li>• Recognise square numbers from their prime factor list</li> <li>• Use the product rule for counting</li> <li>• Draw a scatter graph from a set of data</li> <li>• Draw a line of best fit</li> <li>• Describe the correlation</li> <li>• Describe the relationship</li> <li>• Read values from a scatter graph and make predictions using a line of best fit and interpolation and extrapolation</li> <li>• Label a triangle</li> <li>• Know the trigonometric ratios</li> </ul> | <ul style="list-style-type: none"> <li>• Calculate a probability given some data</li> <li>• Answer problems on probability include chance of something not happening</li> <li>• Show a probability on a numberline</li> </ul> |
|--|--|--|--|---|---|--|---|

|  |  |   |   |   |  |  |  |
|--|--|---|---|---|--|--|--|
|  |  |   |   |   |  | <ul style="list-style-type: none"> <li>Use the ratios to find unknown lengths and angles</li> </ul>  |  |
| <p><i>Why are we doing this now? How does it build on prior learning and prepare for knowledge and learning still to come?</i></p> | <p>Algebra skills studied with students in year 8 allow connections to be made from coordinate work from KS2 and linear sequences from year 8 to equations. Further work is done on developing understanding of multiplicative relationship building on multipliers and divisors in year 7.</p> <p>Prior learning that pupils need to remember are:</p> <ul style="list-style-type: none"> <li>How to read and plot co-ordinates</li> <li>How to substitute</li> </ul> | <p>Further sequences building on those learnt in year 8 and using further algebra skills. Pupils further develop their algebra skills linking this back to grid multiplication. Factorising is linked in with factors and multiples. For this year only there is angles work to supplement home learning.</p> <p>Prior learning that pupils need to remember are:</p> <ul style="list-style-type: none"> <li><b>How to simplify algebra</b></li> <li><b>How to multiply out a single bracket</b></li> <li><b>How to factorise a single bracket</b></li> <li>How to identify the pattern of a sequence and use function machine to generate terms</li> </ul> | <ul style="list-style-type: none"> <li>Pupils have understanding of multipliers and how these apply to real life situations. This ties in to enlargement and similarity</li> <li>Pupils have previously constructed accurate triangles and now delve further looking at bisectors and loci</li> <li>Construction of triangles in year 8 leads to learning on congruency</li> <li>Area of circles building on from circumference of circles</li> </ul> <p>Prior learning that pupils need to remember are:</p> <ul style="list-style-type: none"> <li>Use multipliers to find scale factors</li> </ul> | <p>Algebra in year 8 helped develop skills using bar models and beyond. This now continues with harder algebra.</p> <p>Pythagoras builds on properties of triangles and utilises the algebra skills in a new context.</p> <p>Volume builds on 3D shapes in HT2 and work at KS2.</p> <p>Prior learning that pupils need to remember are:</p> <ul style="list-style-type: none"> <li>How to solve simple linear equations</li> <li>Fractions of amounts</li> <li>Simplifying fractions</li> </ul> | <p>Rotations and translations are taught separate to the other transformations to aid students remember the difference between them.</p> <p>Pupils apply number skills either to the product rule or HCF and LCM.</p> <p>Trigonometry is introduced. Pupils have developed maths skills that now allow this to be taught. This includes ratio, algebraic manipulation, properties of triangles.</p> <p>Pupils have plotted coordinates and learnt about straight line graphs</p> | <p>Pupils learn averages at KS2 and this unit builds on this looking at comparing and selecting the best average to use.</p> <p>Data is studied and looking at patterns and trends.</p> <p>Probability is studied using fraction and decimal skills</p> <p>Prior learning that pupils need to remember are:</p> <ul style="list-style-type: none"> <li>Know and calculate mean, mode, median, and range for a set of data or a table of data</li> <li>Adding and subtracting fractions</li> <li>Multiplying fractions</li> </ul> |  |

|  |  |  |   |  |  |   |  |
